Bioenergy Healing Results

Mr. Roland Yakoubov has invented the Bioenergy Healing System. This energy system is able to work through the physical force field of biological organisms.

On October 11, 2015 in Yerevan, an experiment was carried out. Mr. Arman Khachatryan was tested and the experiment was monitored using a 16-channel Electroencephalography (EEG) machine. Mr. Khachatryan was asked to sit quietly with his eyes closed and to focus only on deep breathing and relaxation. Mr. Yakoubov scanned Mr. Khachatryan's energy field with this hands, not touching the testee. Electroencephalography fixed healers' energy.

Experiment has demonstrated that the Bioenergy healing system improved microcirculation, balancing the neurological network of brain cells that work during times of sleep and awake, relaxing the central nervous system, and optimizing and metabolizing microcirculation.

Director A. Khachatryan
